

Finance Control & Risk Intelligence

Turn every financial document, transaction and approval into a controlled, auditable and intelligent workflow.

Customer Presentation

[The Challenge]

The finance gap where value disappears

Losses rarely start as fraud. They start as small, uncontrolled moments before, during and after posting to the ERP.

(01)

Manual capture

Documents keyed in by people under pressure.

(02)

Weak validation

Missing checks create costly errors.

(03)

Hidden leakage

Duplicates and wrong spend pass silently.

(04)

Late visibility

Issues surface only after the cash is gone.

[Our Platform]

What is AiA?

An AI-powered control layer between your business, your finance team and your ERP — capturing, checking and approving every transaction before it reaches your books.

AiA does not replace your ERP — it protects and enriches it.

(01) Capture

Every document, from every channel

(02) Control

Every transaction, checked and approved

(03) Connect

Clean, trusted data into your ERP

Why customers choose AiA

01

Prevent loss

Stop errors and suspicious activity before posting.

02

Automate the manual

Remove repetitive data entry and chasing.

03

Accountable approvals

Clear owners and a full trail for every decision.

04

Keep the ERP clean

Only validated data reaches your books.

05

Live control

Real-time visibility for management decisions.

[How It Works]

From document to decision

One simple, traceable flow for every financial transaction.

One platform, every finance control

(01)

Document Intelligence

Read and understand any financial document.

(04)

Journal Control

Review journals before they hit the books.

(02)

Accounts Payable

Supplier invoices, controlled end to end.

(05)

Smart Audit

Continuous checks for risk and leakage.

(03)

Commercial & Billing

From quotation to revenue, in one flow.

(06)

Budget & Insights

Budgets, cash flow and live dashboards.

[Integration]

Works with your ERP

AiA sits on top of the systems you already run. No rip-and-replace — just stronger control and cleaner data.

+ vendor & customer portals for external collaboration

[The Result]

Business outcomes

Finance runs faster, with fewer hidden risks — and every step is traceable.

“AiA helps your finance team prevent waste, reduce risk and turn every transaction into trusted ERP data.”

Less

Manual work

Fewer

Losses & errors

Cleaner

ERP data

Faster

Audit & close

Start small. Prove value. Scale.

01

Assess

We map your documents, approvals and leakage risks.

02

Pilot

Start with one high-value area, such as AP or billing.

03

Integrate

Connect AiA to your ERP with your rules and workflows.

04

Measure

Track effort saved, exceptions caught and audit readiness.

05

Scale

Roll out further modules across finance.

Make finance intelligent, controlled and audit-ready.

Thank You
